## DETAILED ACTION

### *Response to Amendment*

1. Claim 13 has been amended as requested in the amendment filed on August 16, 2006.

Following the amendment, claims 5-6 and 9-16 are pending in the instant application.

Claims 5-6, 9-12 and 14-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 07, 2006.

Claim 13 is under examination in the instant office action.

2. The Text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Any objection or rejection of record, which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.
4. Applicant's arguments filed on August 16, 2006 have been fully considered but they are not deemed to be persuasive for the reasons set forth below.

### *Claim Rejections - 35 USC § 112*

5. Claim 13, as amended, stands indefinite as being incomplete for omitting essential steps, such omission amounting to a gap between the steps essentially for reasons of record in section 11 of Paper mailed on March 29, 2006. The omitted steps are: the step that identifies the substrate and the comparison step. See MPEP § 2172.01.

As fully explained in the previous office action of record, one skilled in the art readily appreciates that not every compound that is moved across the membrane can be identified as an

Art Unit: 1649

OATP2 specific substrate; therefore, it is critical to have a step evaluating the specificity of the transport. Claim 13, as currently presented, allows for identification of a compound that is transported across the cell membrane not necessarily by means of OATP2 protein. An example of a proper comparison step would include a standard control, wherein a cell lacking OATP2 transporter is contacted with a test compound. A test compound not transported inside the control cell (compound not present in the cell lysate) would be then properly considered as being transported by OATP2 protein.

### ***Conclusion***

6. No claim is allowed.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
